

## Junior Full Stack Developer – Vue.js + PHP/Node.js (Chatbot Platform)

KODA Bots has a unique enterprise-class automated communication management system. It is used by such companies, as TVN, Jeronimo Martins (Biedronka), Santander Consumer Bank, Komputronik, Orbis, or Wroclaw Airport.

Our platform has a **microservice** architecture. We strive to comply with modern software development standards. Our team works with **weekly sprints** and uses **Continuous Integration** and **Continuous Delivery** to implement new software versions.

**Job type:** Full-time

**Salary:** 3000-5000 PLN netto per month (B2B agreement)

**We will help you gain practical experience in different fields of programming. You will learn, among others:**

- design rules used to build efficient **systems and databases**;
- **natural language processing** mechanisms based on data collected by our chatbots;
- best practices and **design patterns (Code Review)**;
- IT system **integration methods** (e.g. REST API, WebSocket);
- how to develop non-standard **web apps** – our panel is **not entirely made up of forms**, we create dedicated components, which make it easy for our users to easily edit the chatbot structure and train the NLP module;
- **event-driven** architecture (message queues);
- **rules of writing secure codes** (we provide solutions for companies from the banking sector, where codes need to be accepted by security departments).

**If you:**

- show us your code where you've:
  - implemented at least **one Front-end framework** (we prefer **Vue.js/React**),
  - implemented **REST API** with **unit tests** in any language (we prefer Node.js with Typescript, PHP, Python),
  - used a **database**;
- know the **basics of git** (we use git-flow in our daily work);
- are independent, conscientious, and strive to broaden your knowledge;
- **know English** at a proficiency where you can freely communicate and read technical documentation (all conversations in the JIRA system use this language).

**It would be nice if you:**

- are interested in **chatbots and NLP** (you're familiar with such terms, as Dialogflow, Messenger API, Wit.ai, Google Actions);
- have used an **Elastic search** database;
- know the basics of **Docker** (local image activation);
- have worked with Google Cloud Platform or a different **public cloud**.

## Your responsibilities will include:

- **platform integrations** with external systems (e.g. with a flight system used by an airport, a broadcasting system, or loyalty programs);
- enhancing our platform with **new plugins**;
- **cost estimation** of performed tasks;
- running **Code Review** to learn about the best coding practices used by more experienced members of our team;
- describing changes and modifications in the **documentation**;
- **responsibility** for the codes you write;
- **fixing** detected bugs.

## We guarantee:

- no corporate structure or dresscode;
- **ability to talk with specialists** from various fields (Data Analytics, Machine Learning, SEO, Web Development) – we are part of the Hexe Capital group;
- **that your work will have an impact on the final** product and its functionality;
- work in a motivated team of experienced specialists.

## You don't have to:

- know everything about every technology. It's enough that you strive to develop your skills;
- have higher education.

Your **CV** must include **a link to your code repository** and a personal data protection clause:

"I hereby give consent for my personal data included in the application to be processed by KODA Bots Sp. z o.o. for the purposes of the recruitment process."
