

Regular Fullstack Developer - Vue.js + PHP/ Node.js (Chatbot Platform)

KODA Bots has a unique enterprise-class automated communication management system. It is used by such companies, as TVN, Jeronimo Martins (Biedronka), Santander Consumer Bank, Komputronik, Orbis, or Wroclaw Airport.

Our platform has a **microservice** architecture. We strive to comply with modern software development standards. Our team works with **weekly sprints** and uses **Continuous Integration** and **Continuous Delivery** to implement new software versions.

Job type: Full-time

Salary: 7000 - 9000 PLN netto per month (B2B agreement)

Working with us you will develop your skills in:

- designing rules used to build efficient **systems and databases**;
- **natural language processing** mechanisms based on data collected by our chatbots;
- creating IT system **integration methods** (e.g. REST API, WebSocket);
- developing non-standard **web apps** – our panel is **not entirely made up of forms**, we create dedicated components, which make it easy for our users to easily edit the chatbot structure and train the NLP module;
- **designing** and **implementation** of scalable architecture;
- **creating secure solutions** audited by our clients' security departments

If you:

- have at least 3+ years of proven experience.
- worked in a commercial project with at least one **server-side** programming **language** (preferably Node.js from Typescript, PHP, Python) using any framework (e.g. Laravel) and one database library used to create web applications (preferably Vue.js).
- know the **basics of git** (we use git-flow in our daily work);
- are independent, conscientious, and strive to broaden your knowledge;
- know the basics of **Docker**;
- know the rules of designing the REST API
- you have the skills to test and document the code you create
- you know the programming standards, rules for writing clean code and you're able to put them into practice;
- **know English** at a proficiency where you can freely communicate and read technical documentation (all conversations in the JIRA system use this language).

It would be nice if you:

- are interested in **chatbots and NLP** (you're familiar with such terms, as Dialogflow, Messenger API, Wit.ai, Google Actions...);
- have used an **Elastic search** database;
- have worked with Google Cloud Platform or a different **public cloud**.

Your responsibilities will include:

- **platform integrations** with external systems (e.g. with a flight system used by an airport, a broadcasting system, or loyalty programs);
- enhancing our platform with **new plugins**;
- **cost estimation** of performed tasks;
- running **Code Review** to learn about the best coding practices used by more experienced members of our team;
- describing changes and modifications in the **documentation**;
- **responsibility** for the codes you write;
- **fixing** detected bugs.
- **sharing your knowledge** with other team members.

We guarantee:

- no corporate structure or dresscode;
- **ability to talk with specialists** from various fields (Data Analytics, Machine Learning, SEO, Web Development) – we are part of the Hexe Capital group;
- **that your work will have an impact on the final** product and its functionality;
- work in a motivated team of experienced specialists.

You don't have to:

- know everything about every technology. It's enough that you strive to develop your skills;
- have higher education.

Your **CV** must include a personal data protection clause:

"I hereby give consent for my personal data included in the application to be processed by KODA Bots Sp. z o.o. for the purposes of the recruitment process."
